

St. Vincent Mercy Medical Center
Douglass & LaSR
HUMAN PATIENT SIMULATION LAB
Quick Reference Sheet

Department: Nursing Staff Development

Purpose: Critical Care Nurse Class

Usual Lab Day & Time: Every Thursday, 1 – 4pm

Patient/Case Name: Willie Makit

Instructor Reference Sheet: Care of the Cardiopulmonary Arrest Patient

Run on Patient: Standard Man

Run on Scenario(s): ACLS scenarios: 1. Ventricular Fibrillation & Tachycardia
2. Pulseless Electrical Activity

Run on the Fly: Tab – Cardiovascular, Heart, Cardiac Rhythm
Override, Vfib/Vtach without pulse/PEA
Tab – Cardiovascular, External Cardiac Stimulation, Defibrillation

Setting: Patient Room

Costume: Hospital gown

Moulage: Older man. Balding or salt & pepper wig. Wound on forehead from fall, blood down nose, possible teeth knocked out. Glasses (broken). Bandaged lumbar spine. Blue eye shadow dusted on nail beds and around nose/eyes/earlobes. Pupils dilated.
PEA – Consider chunk of ‘food’ in throat as airway occluder. Activate in software.

Props: Over bed table (knocked over), food, plate, cups, water etc. scattered on floor and under patient. Bedside table with cards/flowers. Clutter.

Equipment: **outside of room** - Defibrillator/stocked crash cart (meds, fluids, advanced airway equipment), back board, c-collar
Inside room - IV set up. Nasal cannula, non-rebreater, suction, towels.

Confederates: Patient family. Doc. Pastoral Care.

Making Willie Makit

(or anything else for that matter!)

Equipment:	Biomed loaners or out of service, hospital storage, raid The Cage (where departments store bulky items such as beds, chairs, over bed and bedside tables, etc.)
Meds:	Pharmacy expired
Med/Surg supply:	Raid central supply/decontam. Thousands of dollars of expired or opened-by-accident items (drapes/tape/IV/suture/caths/and muchmuchmore) SVMCM usually ships to The Mission...I have my own mission. Make friends in Emergency, Respiratory and Flight departments (they throw out expired supplies by the billions) for an endless supply of chest tubes/IV caths/airway management equipment
Gowns/bedding:	Linen dept always has extras/gently used to donate
Wigs/glasses/wounds Makeup/humanizing props:	Local costume shops (after Halloween sale jackpots), dollar stores, resale shops
Special FX:	METI or simulaid moulage kits, costume shops, online resources (make your own!)
My Faves -	www.gore-galore.com liquid latex www.smooth-on.com rubber, plastic, foam for all types of applications (makes great reusable wounds, realistic skin) Located in Pennsylvania...offer classes! www.compositeeffects.com blood, slime, makeup, adhesives, human forms, body parts, latex appliances www.dappercadaver.com realistic anatomical props, blood Kinda pricey but realistic www.frightprops.com pneumatics, prop controllers
